- Software Development Life Cycle

### Relevant Experience

**Full-Stack Developer – Intern/Volunteer** Jul/2020 - Present  
The Girl Code

*Tech: ReactJs, Gatsby, Theme UI, and Figma*

- Collaborated with designers to create a new teaching platform and website for girls who want to learn python.

**Front-End Developer – Volunteer** Apr/2020 - Present  
Code Mentoring

*Tech: NestJs, ReactJs, Typescript, GraphQL, Apollo, Styled Components, Storybook, Lerna, and Figma*

- Participated in the development of a story-telling teaching platform for people to learn how to code.
- Worked on an Agile team with month-long sprints and weekly touchpoints with the PM, and designers, to fully understand solution mock-ups and the flow of the application.
- Lead the frontend team, organized meetings, and coordinated the project's features, bugs, and the prioritization of work.

**Shopify Developer – Volunteer** Mar/2020 - May/2020  
shopHere

*Tech: Shopify themes*

- Worked with Digital Main St. and the City of Toronto to build websites for small businesses, providing them with an easy transition to e-commerce during the pandemic.
- Built websites using Shopify's platform and themes, using the specifications and data provided by the client.

### Education

**Software Engineering Bootcamp** Nov/2019 - Feb/2020  
General Assembly (Bitmaker Labs)

*Tech: MVC framework, JavaScript, React, Node.js, MongoDB, Python, Django, PostgreSQL, and more*

- Completed a 450+ hour full-time program focused on full-stack skills development, including both frontend and backend languages.
- Developed and presented projects in both an individual and collaborative agile basis.

### Certifications

**FreeCodeCamp:**

- Responsive Web Design

**Zero To Mastery Academy / Udemy:**

- Complete Web Developer 2020
- Data Structure and Algorithms
- Complete React Developer in 2020 (Redux, Hooks and GraphQL)

**Projects can be found on my GitHub and Portfolio.**
