I am a full-stack developer that translates the geekiness behind ideas into aesthetically pleasing and fluid app for users.
My background in intellectual property law and culinary arts has enhanced my ability to articulate in a business context and to provide creative solutions. This allows me to be an organized and focused team player that collaborates in challenging environments, continuously seeking opportunities to grow and improve, while also developing and delivering. My main expertise is JavaScript and its libraries/frameworks, but I am also knowledgeable on Python. I am currently learning TypeScript and GraphQL/Apollo and looking forward to growing my database of programming language/framework knowledge.

TECH SKILLS

Strong Skills

- CLI, Git, and GitHub
- HTML5 and CSS3
- Bootstrap4, TailwindCSS, and Sass
- JavaScript and jQuery
- AJAX and APIs
- Node.js and Express
- MongoDB and Mongoose
- React
- Heroku, Netlify and MongoDB Atlas

Working Knowledge

- Python, Flask, PostgreSQL, and Django
- JWT, OAuth and PassportJs
